SCHEDULING & LOGISTICS

AUTHOR INDEX FOR 2009

Akturk, M.S., A. Turkcan and R.H. Storer; *Predictive/reactive scheduling with controllable processing times and earliness-tardiness penalties*; December; 1080

Atkins, D. and X. Zhao; *Transshipment between competing retailers*; August; 665

Barlatt, A., A. Cohn, Y. Fradkin, O. Gusikhin and C. Morford; *Using composite variable modeling to achieve realism and tractability in production planning: An example from automotive stamping*; May; 421

Baron, O., O. Berman, S. Kim and D. Krass; *Ensuring feasibility in location problems with stochastic demands and congestion*; May; 467

Begnaud, J., S. Benjaafar and L.A. Miller; *The multi-level lot sizing problem with flexible production sequences*; August; 702

Benjaafar, S., J. Begnaud and L.A. Miller; *The multi-level lot sizing problem with flexible production sequences*; August; 702

Berman, O., O. Baron, S. Kim and D. Krass; *Ensuring feasibility in location problems with stochastic demands and congestion*; May; 467

Çetinkaya, S. and X. Liu; *Designing supply contracts in supplier vs buyer-driven channels: The impact of leadership, contract flexibility and information asymmetry*; August; 687

Cohn, A., A. Barlatt, Y. Fradkin, O. Gusikhin and C. Morford; *Using composite variable modeling to achieve realism and tractability in production planning: An example from automotive stamping*; May; 421

de Kok, A.G., O. Jabali, T. Van Woensel, C. Lecluyse and H. Peremans; *Time-dependent vehicle routing subject to time delay perturbations*; December; 1049

de Véricourt, F., J.-P. Gayon and F. Karaesmen; *Stock rationing in an $M/E_r/1$ multi-class make-to-stock queue with backorders*; December; 1096

Duenyas, I. and D. Kostamis; *Quantity commitment, production and subcontracting with bargaining*; August; 677

Elhedhli, S., N. Vidyarthi and E. Jewkes; *Response time reduction in make-to-order and assemble-to-order supply chain design*; May; 448

Erhun, F. and Ö. Yazlali; *Dual-supply inventory problem with capacity limits on order sizes and unrestricted ordering costs*; August; 716

Fradkin, Y., A. Barlatt, A. Cohn, O. Gusikhin and C. Morford; *Using composite variable modeling to achieve realism and tractability in production planning: An example from automotive stamping*; May; 421

Gayon, J.-P., F. de Véricourt and F. Karaesmen; *Stock rationing in an $M/E_r/1$ multi-class make-to-stock queue with backorders*; December; 1096

Gusikhin, O., A. Barlatt, A. Cohn, Y. Fradkin and C. Morford; *Using composite variable modeling to achieve realism and tractability in production planning: An example from automotive stamping*; May; 421

Gutiérrez-Jarpa, G., V. Marianov and C. Obreque; *A single vehicle routing problem with fixed delivery and optional collections*; December; 1067

Jabali, O., T. Van Woensel, A.G. de Kok, C. Lecluyse and H. Peremans; *Time-dependent vehicle routing subject to time delay perturbations*; December; 1049

Jeet, V., E. Kutanoglu and A. Partani; *Logistics network design with inventory stocking for low-demand parts: Modeling and optimization*; May; 389

Jewkes, E., N. Vidyarthi and S. Elhedhli; *Response time reduction in make-to-order and assemble-to-order supply chain design*; May; 448

Karabatı, S., B. Tan and Ö.C. Öztürk; *A method for estimating stock-out-based substitution rates by using point-of-sale data*; May; 408

Karaesmen, F., J.-P. Gayon and F. de Véricourt; *Stock rationing in an $M/E_r/1$ multi-class make-to-stock queue with backorders*; December; 1096

Kim, S., O. Baron, O. Berman, and D. Krass; *Ensuring feasibility in location problems with stochastic demands and congestion*; May; 467

Kostamis, D. and I. Duenyas; *Quantity commitment, production and subcontracting with bargaining*; August; 677

Krass, D., O. Baron, O. Berman and S. Kim; *Ensuring feasibility in location problems with stochastic demands and congestion*; May; 467

Kutanoglu, E., V. Jeet and A. Partani; *Logistics network design with inventory stocking for low-demand parts: Modeling and optimization*; May; 389

Lecluyse, C., O. Jabali, T. Van Woensel, A.G. de Kok and H. Peremans; *Time-dependent vehicle routing subject to time delay perturbations*; December; 1049

Liu, M., M.M. Srinivasan and N. Vepkhvadze; *What is the value of real-time shipment tracking information?*; December; 1019

Liu, X. and S. Çetinkaya; *Designing supply contracts in supplier vs buyer-driven channels: The impact of leadership, contract flexibility and information asymmetry*; August; 687

Marianov, V., G. Gutiérrez-Jarpa and C. Obreque; *A single vehicle routing problem with fixed delivery and optional collections*; December; 1067

McLay, L.A.; *A maximum expected covering location model with two types of servers*; August; 730

Miller, L.A., J. Begnaud and S. Benjaafar; *The multi-level lot sizing problem with flexible production sequences*; August; 702

Morford, C., A. Barlatt, A. Cohn, Y. Fradkin and O. Gusikhin; *Using composite variable modeling to achieve realism and tractability in production planning: An example from automotive stamping*; May; 421

Obreque, C., G. Gutiérrez-Jarpa and V. Marianov; *A single vehicle routing problem with fixed delivery and optional collections*; December; 1067

Öztürk, Ö.C., S. Karabatı and B. Tan; *A method for estimating stock-out-based substitution rates by using point-of-sale data*; May; 408

Partani, A., V. Jeet and E. Kutanoglu; *Logistics network design with inventory stocking for low-demand parts: Modeling and optimization*; May; 389

Peremans, H., O. Jabali, T. Van Woensel, A.G. de Kok and C. Lecluyse; *Time-dependent vehicle routing subject to time delay perturbations*; December; 1049

Prokopyev, O., J. Rajgopal, Z. Wang and A. Schaefer; *Effective management policies for remnant inventory supply chains*; May; 437

Rajaram, K. and Z. Tian; *Buffer location and sizing to optimize cost and quality in semi-continuous manufacturing processes: Methodology and application*; December; 1035
Rajgopal, J., Z. Wang, A. Schaefer and O. Prokopyev; *Effective management policies for remnant inventory supply chains*; May; 437

Schaefer, A., J. Rajgopal, Z. Wang and O. Prokopyev; *Effective management policies for remnant inventory supply chains*; May; 437
Srinivasan, M.M., M. Liu and N. Vepkhvadze; *What is the value of real-time shipment tracking information?*; December; 1019
Storer, R.H., A. Turkcan and M.S. Akturk; *Predictive/reactive scheduling with controllable processing times and earliness-tardiness penalties*; December; 1080

Tan, B., S. Karabatı and Ö.C. Öztürk; *A method for estimating stock-out-based substitution rates by using point-of-sale data*; May; 408
Tian, Z. and K. Rajaram; *Buffer location and sizing to optimize cost and quality in semi-continuous manufacturing processes: Methodology and application*; December; 1035
Turkcan, A., M.S. Akturk and R.H. Storer; *Predictive/reactive scheduling with controllable processing times and earliness-tardiness penalties*; December; 1080

OPERATIONS ENGINEERING

AUTHOR INDEX FOR 2009

Ahghari, M. and B. Balcıoğlu; *Benefits of cross-training in a skill-based routing contact center with priority queues and impatient customers*; June; 524

Alexopoulos, C., C. Antonini, D. Goldsman and J.R. Wilson; *Area variance estimators for simulation using folded standardized time series*; February; 134

Antonini, C., C. Alexopoulos, D. Goldsman and J.R. Wilson; *Area variance estimators for simulation using folded standardized time series*; February; 134

Avramidis, A.N., W. Chan and P. L'Ecuyer; *Staffing multi-skill call centers via search methods and a performance approximation*; June; 483

Balcıoğlu, B. and M. Ahghari; *Benefits of cross-training in a skill-based routing contact center with priority queues and impatient customers*; June; 524

Chambers, C., P. Kouvelis and P. Su; *Adoption of cost-reducing technology by asymmetric duopolists in stochastically evolving markets*; February; 145

Chan, W., A.N. Avramidis and P. L'Ecuyer; *Staffing multi-skill call centers via search methods and a performance approximation*; June; 483

Das, T.K. and V. Nanduri; *A reinforcement learning algorithm for obtaining the Nash equilibrium of multi-player matrix games*; February; 158

Erdelyi, A. and H. Topaloglu; *Computing protection level policies for dynamic capacity allocation problems by using stochastic approximation methods*; June; 498

Gershwin, S.B., N. Maggio, A. Matta and T. Tolio; *A decomposition approximation for three-machine closed-loop production systems with unreliable machines, finite buffers and a fixed population*; June; 562

Gershwin, S.B., B. Tan and M.H. Veatch; *Production control with backlog-dependent demand*; June; 511

Goldsman, D., C. Antonini, C. Alexopoulos and J.R. Wilson; *Area variance estimators for simulation using folded standardized time series*; February; 134

Grant, H. and S. Settles; *A survey of issues in biomanufacturing research*; June; 537

Hopp, W.J., E. Tekin and M.P. Van Oyen; *Pooling strategies for call center agent cross-training*; June; 546

Jacobson, S.H., L.A. McLay and A.G. Nikolaev; *A sequential stochastic passenger screening problem for aviation security*; June; 575

Kaminsky, P. and O. Kaya; *Combined make-to-order/make-to-stock supply chains*; February; 103

Kaya, O. and P. Kaminsky; *Combined make-to-order/make-to-stock supply chains*; February; 103

Klabjan, D.; *Book Review of Approximate dynamic programming: Solving the curses of dimensionality*; February; 168

Kouvelis, P., C. Chambers and P. Su; *Adoption of cost-reducing technology by asymmetric duopolists in stochastically evolving markets*; February; 145

L'Ecuyer, P., A.N. Avramidis and W. Chan; *Staffing multi-skill call centers via search methods and a performance approximation*; June; 483

Maggio, N., A. Matta, S.B. Gershwin and T. Tolio; *A decomposition approximation for three-machine closed-loop production systems with unreliable machines, finite buffers and a fixed population*; June; 562

Masin, M. and V. Prabhu; *AWIP: A simulation-based feedback control algorithm for scalable design of self-regulating production control systems*; February; 120

Matta, A., N. Maggio, S.B. Gershwin and T. Tolio; *A decomposition approximation for three-machine closed-loop production systems with unreliable machines, finite buffers and a fixed population*; June; 562

McLay, L.A., S.H. Jacobson and A.G. Nikolaev; *A sequential stochastic passenger screening problem for aviation security*; June; 575

Nanduri, V. and T.K. Das; *A reinforcement learning algorithm for obtaining the Nash equilibrium of multi-player matrix games*; February; 158

Nikolaev, A.G., L.A. McLay and S.H. Jacobson; *A sequential stochastic passenger screening problem for aviation security*; June; 575

Prabhu, V. and M. Masin; *AWIP: A simulation-based feedback control algorithm for scalable design of self-regulating production control systems*; February; 120

Settles, S. and H. Grant; *A survey of issues in biomanufacturing research*; June; 537

Su, P., C. Chambers and P. Kouvelis; *Adoption of cost-reducing technology by asymmetric duopolists in stochastically evolving markets*; February; 145

Tan, B., S.B. Gershwin and M.H. Veatch; *Production control with backlog-dependent demand*; June; 511

Tekin, E., W.J. Hopp and M.P. Van Oyen; *Pooling strategies for call center agent cross-training*; June; 546

Tolio, T., N. Maggio, A. Matta and S.B. Gershwin; *A decomposition approximation for three-machine closed-loop production systems with unreliable machines, finite buffers and a fixed population*; June; 562

Topaloglu, H. and A. Erdelyi; *Computing protection level policies for dynamic capacity allocation problems by using stochastic approximation methods*; June; 498

Van Oyen, M.P., E. Tekin and W.J. Hopp; *Pooling strategies for call center agent cross-training*; June; 546

Veatch, M.H.; *The impact of customer impatience on production control*; February; 95

Veatch, M.H., S.B. Gershwin and B. Tan; *Production control with backlog-dependent demand*; June; 511

Wilson, J.R., C. Antonini, C. Alexopoulos and D. Goldsman; *Area variance estimators for simulation using folded standardized time series*; February; 134

Burcu Keskin, University of Alabama, Alabama
Dmitry Krass, University of Toronto, Canada
Sumit M. Kunnumkal, Indian School of Business, India

Erjen Lefeber, Technical University of Eindhoven, The Netherlands
Kyle Lin, Naval Postgraduate School, California
Yifan Liu, George Mason University, Virginia

Vladimir Marianov, Pontifica Universidad, Chile
David P. Morton, University of Texas at Austin, Texas

John Price, Monash University, Australia
Martin Puterman, University of British Columbia, Canada

Xiangtong Qi, University of Science and Technology, Hong Kong

Jennifer Ryan, Rensselaer Polytechnic Institute, New York

Andrew J. Schaefer, University of Pittsburgh, Pennsylvania
Caspar Schweigman, University of Groningen, The Netherlands
Hugo P. Simao, Princeton University, New Jersey
James E. Smith, Duke University, North Carolina

Elif Tokar-Erdemir, University of Minnesota, Minnesota
Stathis Tompaidis, University of Texas, Texas

Michael R. Wagner, California State University East Bay, California
Stefan Weber, Leibniz Universität, Hannover, Germany
James Wilson, North Carolina State University, Raleigh, North Carolina
David L. Woodruff, University of California, Davis, California

Ming-Jong Yao, Tunchai University, Taiwan
Janey Yu, University of Helsinki, Finland

QUALITY & RELIABILITY ENGINEERING

AUTHOR INDEX FOR 2009

Acharya, N.N. and H.B. Nembhard; *Bayesian algorithms for missing observations in experimental designs for a nanolubrication process*; November; 969

Albin, S. and H. Zhang; *Detecting outliers in complex profiles using a χ^2 control chart method*; April; 335

Alexopoulos, C., J. Lee, D. Goldsman, S.-H. Kim, K.-L. Tsui and J.R. Wilson; *Monitoring autocorrelated processes using a distribution-free tabular CUSUM chart with automated variance estimation*; November; 979

Bergman, B.; *Conceptualistic Pragmatism: A framework for Bayesian analysis?*; January; 86

Brice, P. and W. Jiang; *A context tree method for multistage fault detection and isolation with applications to commercial video broadcasting systems*; September; 776

Capizzi, G. and G. Masarotto; *Bootstrap-based design of residual control charts*; April; 275

Ceglarek, D., W. Huang and T. Phoomboplab; *Process capability surrogate model-based tolerance synthesis for multi-station manufacturing systems*; April; 309

Chaipradabgiat, T., J. Jin and J. Shi; *Optimal fixture locator adjustment strategies for multi-station assembly processes*; September; 843

Chakraborty, S., N. Gebraeel, M. Lawley and H. Wan; *Residual-life estimation for components with non-symmetric priors*; April; 372

Chen, N. and S. Zhou; *Detectability study for statistical monitoring of multivariate dynamic processes*; July; 593

Chen, Y. and Q. Yang; *Sensor system reliability modeling and analysis for fault diagnosis in multistage manufacturing processes*; September; 819

Chen, Y. and S. Li; *Sensor fault detection for manufacturing quality control*; July; 605

Cho, B.R. and S. Shin; *Studies on a biobjective robust design optimization problem*; November; 957

Chun, Y.H.; *Improving product quality by multiple inspections: Prior and posterior planning of serial inspection procedures*; September; 831

Cook, J.L. and J.E. Ramirez-Marquez; *Mobility and reliability modeling for a mobile ad hoc network*; January; 23

Del Castillo, E. and O.A. Vanli; *Bayesian approaches for on-line robust parameter design*; April; 359

Ding, Y. and Y. Ren; *Optimal sensor distribution in multi-station assembly processes for maximal variance detection capability*; September; 804

Ebrahimi, N.; *The mean function of a repairable system functioning process subject to an imperfect repair policy*; January; 57

Elsayed, E.A.; *Foreword*; January; 1

Feng, Q., H. Sahin and M.J. Karson; *Bayesian analysis models for aviation baggage screening*; November; 995

Fenner, J.S., Y.-S. Jeong, M.K. Jeong and J.-C. Lu; *A Bayesian parallel site methodology with an application to uniformity modeling in semiconductor manufacturing*; September; 754

Fernández-Villodre, G., J.E. Ruiz-Castro and R. Pérez-Ocón; *A level-dependent general discrete system involving phase-type distributions*; January; 45

Gebraeel, N., S. Chakraborty, M. Lawley and H. Wan; *Residual-life estimation for components with non-symmetric priors*; April; 372

Goldsman, D., J. Lee, C. Alexopoulos, S.-H. Kim, K.-L. Tsui and J.R. Wilson; *Monitoring autocorrelated processes using a distribution-free tabular CUSUM chart with automated variance estimation*; November; 979

Herer, Y.T. and A. Tzimerman; *Off-line inspections under inspection errors*; July; 626

Hu, S.J., J. Liu and J. Shi; *Quality-assured setup planning based on the stream-of-variation model for multi-stage machining processes*; April; 323

Huang, H.-Z., J. Qu and M.J. Zuo; *Genetic-algorithm-based optimal apportionment of reliability and redundancy under multiple objectives*; April; 287

Huang, W., T. Phoomboplab and D. Ceglarek; *Process capability surrogate model-based tolerance synthesis for multi-station manufacturing systems*; April; 309

Huang, Y.-S. and C. Yen; *A study of two-dimensional warranty policies with preventive maintenance*; April; 299

Huwang, L., A.B. Yeh and Y.-M. Li; *Profile monitoring for a binary response*; November; 931

Jeong, M.K., J.S. Fenner, Y.-S. Jeong and J.-C. Lu; *A Bayesian parallel site methodology with an application to uniformity modeling in semiconductor manufacturing*; September; 754

Jeong, Y.-S., J.S. Fenner, M.K. Jeong and J.-C. Lu; *A Bayesian parallel site methodology with an application to uniformity modeling in semiconductor manufacturing*; September; 754

Jiang W. and P. Brice; *A context tree method for multistage fault detection and isolation with applications to commercial video broadcasting systems*; September; 776

Jiang, W. and Y. Zhu; *An adaptive T^2 chart for multivariate process monitoring and diagnosis*; November; 1007

Jiao, J., Z. Wu, M. Yang, Y. Liu and Z. Wang; *An enhanced adaptive CUSUM control chart*; July; 642

Jin, J. and J. Li; *Multiscale mapping of aggregated signal features to embedded time–frequency localized operations using wavelets*; July; 615

Jin, J., T. Chaipradabgiat and J. Shi; *Optimal fixture locator adjustment strategies for multi-station assembly processes*; September; 843

Jin, M. and F. Tsung; *A chart allocation strategy for multistage processes*; September; 790

Jin, M. and F. Tsung; *Smith–EWMA run-to-run control schemes for a process with measurement delay*; April; 346

Karson, M.J., Q. Feng and H. Sahin; *Bayesian analysis models for aviation baggage screening*; November; 995

Kim, S.-H., J. Lee, C. Alexopoulos, D. Goldsman, K.-L. Tsui and J.R. Wilson; *Monitoring autocorrelated processes using a distribution-free tabular CUSUM chart with automated variance estimation*; November; 979

Lawley, M., S. Chakraborty, N. Gebraeel and H. Wan; *Residual-life estimation for components with non-symmetric priors*; April; 372

Lee, J., C. Alexopoulos, D. Goldsman, S.-H. Kim, K.-L. Tsui and J.R. Wilson; *Monitoring autocorrelated processes using a distribution-free tabular CUSUM chart with automated variance estimation*; November; 979

Li, J. and J. Jin; *Multiscale mapping of aggregated signal features to embedded time–frequency localized operations using wavelets*; July; 615

Li, S. and Y. Chen; *Sensor fault detection for manufacturing quality control*; July; 605
Li, Y.-M., A.B. Yeh and L. Huwang; *Profile monitoring for a binary response*; November; 931
Lin, C.-H. and S.-T. Tseng; *Stability analysis of single EWMA controller under dynamic models*; July; 654
Lindqvist, B.H. and G. Skogsrud; *Modeling of dependent competing risks by first passage times of Wiener processes*; January; 72
Liu, J., J. Shi and S.J. Hu; *Quality-assured setup planning based on the stream-of-variation model for multi-stage machining processes*; April; 323
Liu, Y., Z. Wu, J. Jiao, M. Yang and Z. Wang; *An enhanced adaptive CUSUM control chart*; July; 642
Lu, J.-C., J.S. Fenner, Y.-S. Jeong and M.K. Jeong; *A Bayesian parallel site methodology with an application to uniformity modeling in semiconductor manufacturing*; September; 754
Lu, J.-C., J. Shi, K.-L. Tsui and S. Zhou; *Foreword*; September; 743

Masarotto, G. and G. Capizzi; *Bootstrap-based design of residual control charts*; April; 275
Mizutani, S. and T. Nakagawa; *Optimum problems in backward times of reliability models*; January; 65

Nakagawa, T. and S. Mizutani; *Optimum problems in backward times of reliability models*; January; 65
Nembhard, H.B. and N.N. Acharya; *Bayesian algorithms for missing observations in experimental designs for a nanolubrication process*; November; 969
Ng, S.H. and M.H.Y. Tan; *Estimation of the mean and variance response surfaces when the means and variances of the noise variables are unknown*; November; 942

Phoomboplab, T., W. Huang and D. Ceglarek; *Process capability surrogate model-based tolerance synthesis for multi-station manufacturing systems*; April; 309
Pérez-Ocón, R., J.E. Ruiz-Castro and G. Fernández-Villodre; *A level-dependent general discrete system involving phase-type distributions*; January; 45

Qin, S.J. and J. Yu; *Variance component analysis based fault diagnosis of multi-layer overlay lithography processes*; September; 764
Qu, J., H.-Z. Huang and M.J. Zuo; *Genetic-algorithm-based optimal apportionment of reliability and redundancy under multiple objectives*; April; 287

Ramirez-Marquez, J.E. and J.L. Cook; *Mobility and reliability modeling for a mobile ad hoc network*; January; 23
Ren, Y. and Y. Ding; *Optimal sensor distribution in multi-station assembly processes for maximal variance detection capability*; September; 804
Ross, S.M.; *A new simulation approach to estimating expected values of functions of Bernoulli random variables under certain types of dependencies*; January; 81
Ruiz-Castro, J.E., G. Fernández-Villodre and R. Pérez-Ocón; *A level-dependent general discrete system involving phase-type distributions*; January; 45

Sahin, H., Q. Feng and M.J. Karson; *Bayesian analysis models for aviation baggage screening*; November; 995
Shi, J. and S. Zhou; *Quality control and improvement for multistage systems: A survey*; September; 744
Shi, J., T. Chaipradabgiat and J. Jin; *Optimal fixture locator adjustment strategies for multi-station assembly processes*; September; 843
Shi, J., J.-C. Lu, K.-L. Tsui and S. Zhou; *Foreword*; September; 743
Shi, J., J. Liu and S.J. Hu; *Quality-assured setup planning based on the stream-of-variation model for multi-stage machining processes*; April; 323
Shin, S. and B.R. Cho; *Studies on a biobjective robust design optimization problem*; November; 957
Singpurwalla, N.D. and A.G. Wilson; *Probability, chance and the probability of chance*; January; 12
Skogsrud, G. and B.H. Lindqvist; *Modeling of dependent competing risks by first passage times of Wiener processes*; January; 72

Tan, M.H.Y. and S.H. Ng; *Estimation of the mean and variance response surfaces when the means and variances of the noise variables are unknown*; November; 942
Tian, Z., M.J. Zuo and R.C.M. Yam; *Multi-state k-out-of-n systems and their performance evaluation*; January; 32
Tseng, S.-T. and C.-H. Lin; *Stability analysis of single EWMA controller under dynamic models*; July; 654
Tsui, K.-L., J.-C. Lu, J. Shi and S. Zhou; *Foreword*; September; 743
Tsui, K.-L., J. Lee, C. Alexopoulos, D. Goldsman, S.-H. Kim and J.R. Wilson; *Monitoring autocorrelated processes using a distribution-free tabular CUSUM chart with automated variance estimation*; November; 979
Tsung, F. and M. Jin; *Smith–EWMA run-to-run control schemes for a process with measurement delay*; April; 346
Tsung, F. and M. Jin; *A chart allocation strategy for multistage processes*; September; 790
Tzimerman, A. and Y.T. Herer; *Off-line inspections under inspection errors*; July; 626

Vanli, O.A. and E. Del Castillo; *Bayesian approaches for on-line robust parameter design*; April; 359

Wan, H., S. Chakraborty, N. Gebraeel and M. Lawley; *Residual-life estimation for components with non-symmetric priors*; April; 372
Wang, Z., Z. Wu, J. Jiao, M. Yang and Y. Liu; *An enhanced adaptive CUSUM control chart*; July; 642
Wilson, A.G. and N.D. Singpurwalla; *Probability, chance and the probability of chance*; January; 12
Wilson, J.R., J. Lee, C. Alexopoulos, D. Goldsman, S.-H. Kim and K.-L. Tsui; *Monitoring autocorrelated processes using a distribution-free tabular CUSUM chart with automated variance estimation*; November; 979
Wu, Z., J. Jiao, M. Yang, Y. Liu and Z. Wang; *An enhanced adaptive CUSUM control chart*; July; 642

Yam, R.C.M., Z. Tian and M.J. Zuo; *Multi-state k-out-of-n systems and their performance evaluation*; January; 32
Yang, M., Z. Wu, J. Jiao, Y. Liu and Z. Wang; *An enhanced adaptive CUSUM control chart*; July; 642
Yang, Q. and Y. Chen; *Sensor system reliability modeling and analysis for fault diagnosis in multistage manufacturing processes*; September; 819
Yeh, W.-C.; *A simple universal generating function method for estimating the reliability of general multi-state node networks*; January; 3
Yen, C. and Y.-S., Huang; *A study of two-dimensional warranty policies with preventive maintenance*; April; 299
Yu, J. and S.J. Qin; *Variance component analysis based fault diagnosis of multi-layer overlay lithography processes*; September; 764
Yeh, A.B., L. Huwang and Y.-M. Li; *Profile monitoring for a binary response*; November; 931

Zhang, H. and S. Albin; *Detecting outliers in complex profiles using a χ^2 control chart method*; April; 335
Zhou S., J.-C. Lu, J. Shi and K.-L. Tsui; *Foreword*; September; 743
Zhou, S. and J. Shi; *Quality control and improvement for multistage systems: A survey*; September; 744
Zhou, S. and N. Chen; *Detectability study for statistical monitoring of multivariate dynamic processes*; July; 593
Zhu, Y. and W. Jiang; *An adaptive T^2 chart for multivariate process monitoring and diagnosis*; November; 1007
Zuo, M.J., H.-Z., Huang and J. Qu; *Genetic-algorithm-based optimal apportionment of reliability and redundancy under multiple objectives*; April; 287
Zuo, M.J., Z. Tian and R.C.M. Yam; *Multi-state k-out-of-n systems and their performance evaluation*; January; 32

KEYWORDS INDEX FOR 2009

χ^2 control chart, 335

action, 86
acyclic network, 3
adaptive control chart, 642
ad hoc networks, 23
aggregated signal, 615
Analysis of Variance, 969
assignable causes, 86
autocorrelated data, 275, 979
average run length, 979, 1007
average time to signal, 790
aviation baggage screening, 995

backup model, 65
backward time, 65
Bayesian, 86
Bayesian algorithms, 969
Bayesian analysis, 995
Bayesian estimation, 843
Bayesian framework, 754
Bayesian model, 831
Bayesian models, 359
Bayesian updating, 372
belief functions, 12
binary response, 931
biobjective optimization, 957
biometry, 12
Brownian motion, 57

categorical data streams, 776
chart allocation, 790
combined array designs, 942
competing risks, 72
control chart, 605
control charts, 275
controllable covariate, 57
cost-effectiveness assessment, 995
counting process, 57
cumulative intensity function, 57
CUSUM chart, 642

data mining, 335, 804
decreasing failure rate, 57
design of experiments, 969
detectability, 593
distribution-free statistical methods, 979
dual-response approach, 957
dynamic models, 654
dynamic programming, 626, 843
dynamic systems, 776

error propagation, 764
estimation of mean and variance models, 942
evolutionary algorithms, 804
EWMA, 346

failure modes, 32
failure time, 65
fault detection, 593
fault diagnosis, 819
first passage time, 72
fixture locator adjustment, 843

gamma process, 57
genetic algorithms, 287

REFEREES FOR 2009

Willem Albers, University of Twente, The Netherlands
Umit Akinc, Wake Forest University, North Carolina
Theodore T. Allen, The Ohio State University, Ohio
Hanan Mohamed Aly, Cairo University, Egypt
Suprasad Amari, Relex Software Corp., Pennsylvania
Francisco Aparisi, Universidad Politecnica de Valencia, Spain
Daniel W. Apley, Northwestern University, Illinois
Cari B. Arnold, The Pennsylvania State University, Pennsylvania

Dragan Banjevic, University of Toronto, Canada
Irad Ben-Gal, Tel Aviv University, Israel
Barbara Benni, University of Wisconsin – La Crosse, Wisconsin
Christophe Berenguer, Universite de Technologie de Troyes, France
Satish T.S. Bukkapatnam, Oklahoma State University, Oklahoma

Jaime A. Camelio, Virginia Tech, Virginia
Michael Caramanis, Boston University, Massachusetts
Chun Kin Chan, Lucent Technologies, New Jersey
Shing Chang, Kansas State University, Kansas
Victoria Chen, University of Texas – Arlington, Texas
Wei Chen, Northwestern University, Illinois
Yong Chen, The University of Iowa, Iowa
Yun-Shiow Chen, Yuan Ze University, Taiwan
Gary Cheng, Purdue University, Indiana

David W. Coit, Rutgers University, New Jersey
Bianca Colosito, Politecnico di Milano, Italy

Yu Ding, Texas A&M University, Texas
Boualem Djehiche, The Royal Institute of Technology (KTH), Sweden
Dragan Djurdjanovic, The University of Texas at Austin, Texas

Elsayed Elsayed, Rutgers University, New Jersey

Rajesh Ganesan, George Mason University, Virginia
Natarajan Gautam, Texas A&M University, College Station, Texas
Robert Gramacy, Cambridge University, Cambridge, UK

David He, University of Illinois at Chicago, Illinois
Wenqing He, University of Western Ontario, Canada
Engshwe Ho, Owens-Illinois, Ohio
Kin-Ping Hui, Defence Science and Technology Organisation, Australia
Longcheen Huwang, National Tsing Hua University, Taiwan
Qiang Huang, University of Southern California, California
Ying Hung, Rutgers University, New Jersey
Xiaoming Huo, Georgia Institute of Technology, Georgia
Chun-Chin Hsu, Chaoyang University of Technology, Taiwan

Myong Jeong, University of Tennessee, Tennessee
Shengbing Jiang, General Motors, Michigan
Wei Jiang, Stevens Institute of Technology, New Jersey

Sagar Kamarthi, Northwestern University, Illinois
Michael Khoo, Universiti Sains Malaysia, Malaysia
Heeyoung Kim, Georgia Institute of Technology, Georgia
Kwang-Jae Kim, Pohang University of Science and Technology, South Korea
Kyungmee Kim, Konkuk University, South Korea
Seoung Bum Kim, University of Texas – Arlington, Texas
Seong-Hee Kim, Georgia Institute of Technology, Georgia
Zhenyu (James) Kong, Oklahoma State University, Oklahoma
Paul Kvam, Georgia Institute of Technology, Georgia

Gregory Levitin, The Israel Electric Corporation, Israel
Chenhua Li, Northeastern University, Massachusetts
Haijun Li, Washington State University, Washington
Jing Li, Arizona State University, Arizona
Zhiguo Li, University of Wisconsin – Madison, Wisconsin
Z.T. Lian, Uuniversity of Macau, Macau
Yun-Chia Liang, Yuan-Ze University, Taiwan
Ching-Jong Liao, National Taiwan University of Science and Technology, Taiwan
Jian Liu, University of Arizona, Arizona
Zhaoheng Liu, Université du Québec, Canada
Huitian Lu, South Dakota State University, South Dakota
Jye-Chyi Lu, Georgia Institute of Technology, Georgia
Michael Luvalle, Rutgers University, New Jersey
Jim Lynch, University of South Carolina, South Carolina

Lisa Maillart, University of Pittsburgh, Pennsylvania
Terrence E. Murphy, Colorado Center for Breast Augmentation, Colorado

Dima Nazzal, University of Central Florida, Florida
William Notz, Ohio State University, Ohio
Mustapha Nourelfath, Université Laval, Canada

Rong Pan, Arizona State University, Arizona
Chanseok Park, Clemson University, South Carolina
Chiwoo Park, Texas A&M University, Texas
Yisrael Parmet, Ben Gurion University of the Negev, Israel
Marcus Perry, University of Alabama, Alabama

Zhiguang(Peter) Qian, University of Wisconsin – Madison, Wisconsin

Hendry Raharjo, Chalmers University of Technology, Sweden
Jose E. Ramirez-Marquez, Stevens Institute of Technology, New Jersey
Marion Reynolds, Virginia Polytechnic Institute and State University, Virginia
Steven Rigdon, Southern Illinois University, Illinois
Nicolai Robin, Erasmus University Rotterdam, The Netherlands
Juan-Eloy Ruiz-Castro, University of Granada, Spain
George Runger, Arizona State University, Arizona
Sarah Ryan, Iowa State University, Iowa

Ismael Sanchez, Universidad Carlos III de Madrid, Spain
Judong Shen, Glaxo Smith Kline, North Carolina
Sinichy Sangmun Shin, Inje University, Republic of Korea
Lianjie Shu, University of Macau, China
Shyong Jian Shyu, Ming Chuan University, Taiwan
Yesim Afife Sireli, University of North Carolina, North Carolina
Ross S. Sparks, Health Informatics Stream, Australia
Stefan Steiner, University of Waterloo, Canada
Ji-wen Sun, Shanghai Jiaotong University, China

Kay C. Tan, National University of Singapore, Singapore
Zhigang Tian, Concordia University, Canada
Manoj Tiwari, India Institute of Technology at Kharagpur, India
G. Tontini, Universidade Regional de Blumenau, Brazil
Fugee Tsung, Hong Kong University of Science and Technology, Hong Kong

Arda Vanli, FAMU-FSU College of Engineering, Florida
Roshan Joseph Vengazhiyil, Georgia Institute of Technology, Georgia
Jeroen K. Vermunt, Tilburg University, The Netherlands

Kaibo Wang, Tsinghua University, China
Kuo-Shon Wang, National Central University, Taiwan
Shuchun Wang, Bank of America, North Carolina
Zaili Wang, Liverpool John Moores University, UK
William Woodall, Virginia Tech, Virginia
Hsien-Chung Wu, National Kaohsiung Normal University, Taiwan
Zhang Wu, Nanyang Technological University, Singapore

Haifeng(Heidi) Xia, Texas A&M University, Texas
Hai-Yan Xu, Shanghai Normal University, China

Kai Yang, Wayne State University, Michigan
Jinn-Yi Yeh, National Chiayi University, Taiwan
Tao Yuan, Ohio University, Ohio

Paul F. Zantek, University of Maryland, Maryland
Li Zeng, University of Wisconsin – Madison, Wisconsin
Guoxi Zhang, Discover Financial Services, Illinois
Hang Zhang, Arizona State University, Arizona
Wu Zhang, Nanyang Technological University, Singapore
Shiyu Zhou, University of Wisconsin – Madison, Wisconsin
